**Subject: Request for Extension of Deadline for Remedial Action Plan  
Former Unocal Facility No. 1975  
1051 Spencer Avenue, Santa Rosa, California  
ENSR Project No. 06940-362-120**

Dear Ms. Bentz,

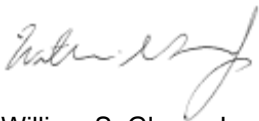

ENSR Corporation (ENSR) has received the California Regional Water Quality Control Board – North Coast Region (NCRWQCB) letter dated February 9, 2006, requesting a Remedial Action Plan (RAP) for the former Unocal service station located at 1051 Spencer Avenue, Santa Rosa, California (site) to be submitted within 60 days (April 9, 2006). ENSR has submitted a work plan on March 9, 2006, outlining additional lateral and vertical assessment activities in the vicinity of the former aboveground storage tank (AST) pads requested by the NCRWQCB. Proposed work activities include:

- 3 Hand Auger soil borings for soil and groundwater concentrations
- 1 Geoprobe soil boring for geotechnical characteristics

Approximately two weeks following completion of field activities, ENSR requests a meeting with the NCRWQCB to discuss the results of the assessment. ENSR proposes to submit the requested RAP approximately 60 days after meeting with the NCRWQCB. Additional data collected from the assessment activities will be incorporated into the RAP, and will assist in the final design and placement of the system.

If you have any questions regarding this project, please contact Mr. William Glenn at (714) 973-3373.

Sincerely,

William S. Glenn, Jr., P.G. #7737
